Codeword

Each number in the puzzle stands for a letter of the alphabet. With the help of our starter letters, work out which letter each number represents. For example, you can now put the letter S in any square where you see the number 21. Once you've done this for each of the starter letters, you'll have clues to help work out which letters appear in other squares.

Codeword

Each number in the puzzle stands for a letter of the alphabet. With the help of our starter letters, work out which letter each number represents. For example, you can now put the letter L in any square where you see the number 4. Once you've done this for each of the starter letters, you'll have clues to help work out which letters appear in other squares.

Codeword

Each number in the puzzle stands for a letter of the alphabet. With the help of our starter letters, work out which letter each number represents. For example, you can now put the letter P in any square where you see the number 22. Once you've done this for each of the starter letters, you'll have clues to help work out which letters appear in other squares.

Codeword

Each number in the puzzle stands for a letter of the alphabet. With the help of our starter letters, work out which letter each number represents. For example, you can now put the letter W in any square where you see the number 5. Once you've done this for each of the starter letters, you'll have clues to help work out which letters appear in other squares.

Codeword

Each number in the puzzle stands for a letter of the alphabet. With the help of our starter letters, work out which letter each number represents. For example, you can now put the letter N in any square where you see the number 25. Once you've done this for each of the starter letters, you'll have clues to help work out which letters appear in other squares.
