BRAIDED RIVER

*Try a Kumihimo Bracelet with Chinese knotting cord.
Made by Deidre Grice of Beads N Crystals.*

MEASUREMENTS

LENGTH: AS DESIRED

STEP ONE

Using five strands or one of each colour, create a lark's knot around the donut – see Image 1 – and pull tight. This will now give 10 strands of cord.

STEP TWO

Holding the board face up, place the donut through the hole of the plate, so that the cord is at the front. Place one cord in each Groove from 3-8 at the top and 14-17 at the bottom. See Image 2.

STEP THREE

Move cord from Groove 5 and move it to Groove E; move cord from Groove 6 to Groove E on the other side. See Image 3.

STEP FOUR

Move cord from 15 to 5; 4 to 15; 14 to 4 and 3 to 14.

STEP FIVE

Repeat the same 'weaving' pattern with the right half of the board. Move 16 to 6; 7 to 16; 17 to 7 and 8 to 17.

Image 1

Image 2

Image 3

STEP SIX

The side cords need to return to the top. Move E to 8; move E to 3. This completes one full sequence. Repeat this sequence to reach the desired length. Create an overhanded knot to stop the cords untying.

STEP SEVEN

Repeat the instructions to create the other side.

STEP EIGHT

Once both sides are completed, place the thread into the needle. Choose an end and sew

through each thread, making sure the work meets flat and not bunched up. This prevents your work untying and helps to put on the ends.

STEP NINE

Cut off the excess cord as close as possible without cutting the thread.

STEP TEN

Open ribbon ends a little further using two chain nose pliers; cover the ends of the cord in E6000 glue and place into the ends; crimp closed

using chain nose pliers.

STEP ELEVEN

Repeat Steps 8 to 10 for the remaining side.

STEP TWELVE

Allow work to dry for at least 24 hours and connect clasp using the oval jump rings.

GLOSSARY

BEGINNER'S TOOL KIT

PINS

Plastic-head pins are useful for checking tension and blocking out items. Pins with coloured heads are best because they do not get lost in your work.

ROW COUNTER

A row counter is helpful for keeping track of rows worked, particularly where increases, decreases or other kinds of patterning occur.

KNITTING NEEDLES

Knitting needles are made from plastic, aluminium or wood and come in varying lengths and widths. Straight needles come in pairs and doublepointed needles come in sets of four.

KNITTING BAG

A knitting bag is essential for those who like to knit 'on the go'. Not only is it a practical way to keep all your knitting paraphernalia together, it also helps keep the yarn clean and tangle-free.

CIRCULAR KNITTING NEEDLES

Circular needles have two working ends joined by a thin nylon wire. They are more balanced than straight needles and allow the weight of your work to rest in your lap.

KNITTING IN ELASTIC

Elastic yarn prevents sagging in cuffs, collars and waists. You can work it in with knitting yarn on knitted or crocheted garments.

TAPE MEASURE

A basic tape measure is essential for checking your garment measurements.

KNITTER'S NEEDLES

Knitter's needles need to have a large eye and a blunt point so they do not split stitches when sewing up your knitting.

STITCH GAUGE

A stitch gauge is a flat piece of metal or plastic with a ruler marked on one side and/or a window

cut out in the centre. It allows you to mark and measure easily and accurately.

STITCH HOLDER

A stitch holder is used to secure stitches not in use. You can also use safety pins for holding a small number of stitches.

Diagram 1

Diagram 2

CASTING ON

Casting on is creating a row of loops on a knitting needle to form the base row for your knitting. One of the most popular methods of casting on is the cable cast on. Form a slipknot about 25cm away from the end of the yarn.

Place the slipknot on a knitting needle and pull gently to secure. Hold this needle in your left hand. Insert the right-hand needle through the slip knot. Pass the yarn over the point of the right-hand needle (see Diagram 1).

Pull a loop through the slip knot with the right-hand needle (see Diagram 2). Place this loop on the left-hand needle and gently pull the yarn to secure the stitch. For the remaining cast-on stitches, insert the right-hand needle between the slip knot and the first stitch on the left-hand needle. Wind the yarn around the point of the right-hand needle. Draw a loop through and place this loop on the left-hand needle. Continue in this manner until you have cast on the desired number of stitches.

KNIT STITCH

Diagram 1

Diagram 2

Once you have cast on, you then knit into the stitches you have made to form the knitted fabric. Hold the needle with the cast on stitches in your left hand, with the loose yarn at the back of your work. Insert the right-hand needle from left to right through the front of the first stitch on the left-hand needle (see Diagram 1). Wind the yarn from left to right over the point of the right-hand needle (see Diagram 2). Draw the

yarn through the stitch to form a new stitch on the right-hand needle. Slip the original stitch off the left-hand needle, keeping the new stitch on the right-hand needle. To knit a row, repeat these steps until all the stitches have been transferred from the left-hand needle to the right-hand needle. Turn your work, transferring the needle with the stitches on into your left hand to work the next row.

PURL STITCH

Diagram 1

Diagram 2

The purl stitch is basically the reverse of the knit stitch. Hold the needle with the stitches on in your left hand, with the loose yarn at the front of your work. Insert the right-hand needle from right to left into the front of the first stitch on the left-hand needle (see Diagram 1). Wind the yarn from right to left over the point of the right-hand needle (see Diagram 2). Draw the yarn through the

stitch to form a new stitch on the right-hand needle. Slip the original stitch off the left-hand needle, keeping the new stitch on the right-hand needle. To purl a row, repeat these steps until all the stitches have been transferred from the left-hand needle to the right-hand needle. Turn your work, transferring the needle with the stitches on into your left hand to work the next row.

CASTING OFF

KNITWISE

Knit two stitches. Use the point of the left-hand needle to lift the first stitch on the right-hand needle over the second, and drop it off the needle. Knit the next stitch on the left-hand needle so that there are two stitches on the right-hand needle again, and repeat. Continue in this manner until all the stitches have been worked off the left-hand needle and only one stitch remains on the right-hand needle. Cut the yarn, leaving a tail and thread the yarn through the loop and pull it firmly to fasten off.

Diagram 1

PURLWISE

Purl two stitches. Use the point of the left-hand needle to lift the first stitch on the right-hand needle over the second, and drop it off the needle. Purl the next stitch on the left-hand needle so that there are two stitches on the right-hand needle again, and repeat. Continue in this manner until all the stitches have been worked off the left-hand needle and only one stitch remains on the right-hand needle. Secure this last stitch as described in casting off knitwise.

Diagram 2

SUBSTITUTING YARNS

If you substitute or spin a yarn for a project, you can compare the weight of the yarn to the project yarn by comparing wraps per inch. Wrap your yarn around a ruler for one inch and count the number of wraps. If you have more wraps per inch than the project yarn, your yarn is too thin; if you have fewer wraps per inch than the project yarn, your yarn is too thick.

KNITTING TENSION

Checking your knitting tension, that is, the tightness or looseness of your knitting, is important. To check your tension, cast on 30 stitches using the recommended needle size. Work in the pattern until your work measures 10cm from the cast on edge then cast off. You now have a "swatch". Measure your tension by placing a ruler over your swatch and counting the number of stitches

across and rows down (including fractions of stitches and rows) in 10cm. Repeat these measurements two to three times on a different parts of the swatch to check your measurements. If you have more stitches and rows than called for in the instructions, you should use larger needles; if you have fewer, use smaller needles. Check your tension again before starting your project.

PROVISIONAL CAST ON (INVISIBLE CAST ON)

Place a loose slipknot on the needle in your right hand. Hold the waste yarn next to the slipknot and around your left thumb. Hold your working yarn over your left index finger.

*Bring the needle forward under the waste yarn, over the working yarn, grab a loop of working yarn (Diagram

1), then bring the needle to the front, over both yarns, and grab a second loop (Diagram 2). Repeat from * until you have the desired number of stitches on your needle. When you're ready to work in the opposite direction, pick out the waste yarn to expose the live stitches.

BACKSTITCH

This is the stitch most commonly used for joining knitted garments. With the right sides of your work together, pin the knitted fabric together with the edges even. The seam should be sewn one full stitch from the end of the row. One stitch should be worked over every row. Thread the yarn needle. Insert the needle through both layers and sew two stitches to the left then one stitch back to the right. Keep stitches at an even distance. Continue working from right to left in this circular motion. (Diagram 1)

TASSELS

Cut yarn twice the length of your desired tassel plus a bit extra for the knot. According to the desired thickness of the tassel, select a number of lengths of yarn. Fold the lengths of yarn in half over a crochet hook. On the wrong side, insert the crochet hook from the front to the back through the edge of the work. Grab the yarn and pull through and tighten. Trim the ends to the same length.

KNOTTED FRINGE

After working a tassel, take one half of the strands from each tassel and knot them with half the strands from the neighbouring tassel. Trim.

CROCHET CHAIN

Make a slip knot on your hook. Pass the yarn over the hook and catch it with the hook and draw it through the loop on the hook. Repeat, drawing yarn through the last loop formed.

DOUBLE CROCHET (DC) (US SINGLE CROCHET SC)

Insert the hook through the top two loops of a stitch. Pass the yarn over the hook and draw up a loop so that you have two loops on the hook (Diagram 1). Pass the yarn over the hook and draw through both loops on the hook (Diagram 2). Continue in the same way, inserting the hook into each stitch (Diagram 3).

HALF TREBLE CROCHET (HTR) (US HALF DOUBLE CROCHET HDC)

Pass the yarn over the hook. Insert the hook through the top two loops of a stitch (Diagram 1). Pass the yarn over the hook and draw up a loop so that there are three loops on the hook (Diagram 2). Draw through all three loops on the hook (Diagram 3).

TREBLE CROCHET (TR) (US DOUBLE CROCHET DC)

Diagram 1

Pass the yarn over the hook. Insert the hook through the top two loops of a stitch (Diagram 1). Pass the yarn over the hook and draw up a loop so that you have three loops on the hook (Diagram 2). Pass the yarn over the hook and draw it through the first two loops on the hook, pass the yarn over the hook and draw through the remaining two loops. Continue in the same way, inserting the hook into each stitch (Diagram 3).

**SLIP STITCH CROCHET (SL ST)**

Insert your hook into the stitch. Yarn over the hook and draw the loop through the stitch and loop onto the hook.

I-CORD

With double-pointed needles, cast on the desired number of stitches. *Without turning the needle, slide the stitches to the other end of the needle, pull the yarn around the back and knit the stitches as usual. Repeat from * until your work measures the desired length

**PICKING UP DROPPED STITCHES**

A dropped stitch can be picked up using a crochet hook and don't be put off by stitches that have unraveled several rows down into the work. To pick up knit stitches, insert the crochet hook into the dropped stitch, draw through the bar lying above the dropped stitch and pull it through the loop of the dropped stitch.
